The Australian Network Of Structural Health Monitoring
2025 Workshop

ANSHM 2025 WORKSHOP SPONSORSHIP OPPORTUNITY

- We are offering a limited number of sponsorship opportunities for the 2025 ANSHM Structural Health Monitoring Workshop to be held in Newcastle, NSW, on 20th & 21st of November 2025
- This premier event is jointly hosted by EngAnalysis and The University of Newcastle
- Australia's unique challenges—such as sparse populations, remote infrastructure, and a need for efficient asset management—have driven the development of world-leading structural health monitoring (SHM) practices.
- The annual ANSHM Workshop brings together experts across disciplines—technology providers, infrastructure owners, researchers, and regulators—to present cutting-edge developments and flagship projects in the SHM space.
- The 2025 workshop theme, “Custodianship,” will focus on the strategic use of structural data to support long-term asset stewardship.
- Topics will explore the emergent capability and limitations of the evolving technologies that facilitate improved management of structures and risk
- We anticipate an audience of 80–100 technical professionals, including senior engineers, researchers, and key decision-makers from utilities, infrastructure owners, and technology developers across Australia
- Sponsoring this event will position your organisation in front of a highly targeted and influential group at the forefront of SHM innovation

For sponsorship enquiries or to secure your sponsorship package, please contact us at ANSHM2025@enganalysis.com.au
